

## ABOUT VIRMEDICE

With a management team that has over 75 years combined experience helping healthcare providers manage their practices and their patients, VirMedice is your solution to office automation and efficiency. With NextGen powered by VirMedice (ASP), even small and mid-size medical practices can successfully transition to a HIPAA Compliant paperless office while minimizing cost and improving cash flow. VirMedice is technology serving medicine.

# Power · Performance · Results

*Have the same powerful EPM/EMR systems used by hospitals, clinics and large medical practices at an affordable price.*

*"VirMedice made the transition from our old records system to the NextGen system easy. With our EPM and EMR system resident at VirMedice and accessible 24/7 online, we get all the power of NextGen, improved reliability, and zero maintenance. The choice was obvious."*

**Julie Tucker**  
Administrator,  
Ocone Urology

*"Instant access to pertinent chart information and ease of documentation has greatly enhanced my ability to practice medicine. VirMedice helped us customize the system to our needs, trained our staff and now is always on hand if we have questions. They have revolutionized our office, and I couldn't be happier."*

**Kenneth R. Smith, DO**  
Glenview Medical Clinic

PRACTICE  
MANAGEMENT

*"Through VirMedice and NextGen, we've improved our charge capture rate by 15%, lowered our accounts receivables from 110 days to just 42 and managed over 40% annual practice growth without adding any more staff. The results speak for themselves."*

**Jim Mitchell**  
Chief Operating Officer,  
Amarillo Area Healthcare  
Specialists

**POWER** At last, small and mid-size medical offices can have the same powerful EPM/EMR systems used by hospitals, clinics and large medical practices at an affordable price, and without the costly maintenance. VirMedice, one of the most referred application service providers (ASP) to medical offices, has the answer: NextGen.

**PERFORMANCE** The NextGen EPM module helps you manage patient information, appointment scheduling, billing, electronic insurance claims submissions and processing with accuracy and speed. The EMR module is one of the most preferred and advanced packages in the industry. It maintains complete medical records, streamlines workflow, manages critical patient care data, creates medical documents and letters, manages prescriptions, provides patient education and exchanges data with other healthcare providers including laboratories and hospitals.

**RESULTS** Most preferred and most referred—that comes from delivering results. With VirMedice and NextGen as your success partners, you'll see increased receivables, minimized costs, shortened payment cycles, and reduced professional risk. You'll see the benefits in your bottom line.
